Session 187: Energy of sun or moon

Summary: Our awareness is where our energy is located. The inside and outside, the Sun and the Moon. When our energies are recognized and brought into balance. Three energies come together for the manifestation of reality. I am aware and have brought all of my created energy the sun, the moon and myself. So many sub-energies are consolidated and recognized. The outside forces are dependent on us and we on them. None are greater than the other; all are needed.
